

Chapter 24

MEGHALYA

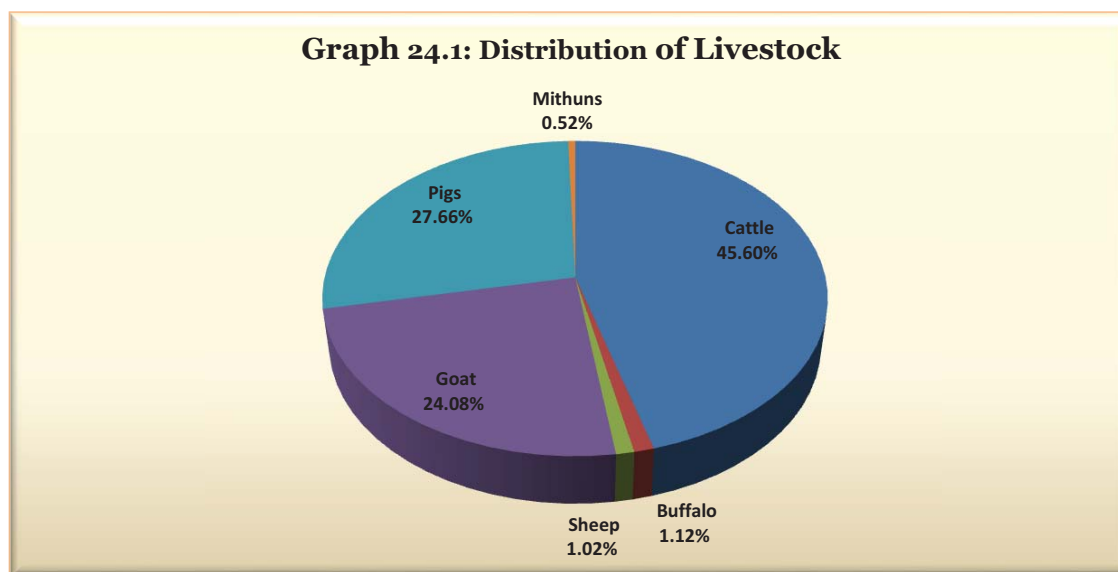

Livestock Population

The following table shows the changes in the total number of livestock in Meghalaya during the two inter censal period.

Table 24.1: Total Livestock Population

18th Livestock Census 2007 (in Millions)	19th Livestock Census 2012 (in Millions)
1.82	1.95

There is an increase in livestock population over 2007 to 2012 from 1.82 million to 1.95 million (excluding 2410 stray cattle) registering a growth of 7.41% in the total number of animals of various species. In Census 2012, the total livestock population has been distributed under various categories as per diagram given below:

The diagram above shows that among the total livestock, Cattle contributes highest with 46% followed by Pigs 28%, Goat 24%, Buffalo 1% and Sheep 1% besides marginal contribution is attributed by other livestock species such as Camel, Mules, Donkeys, Horses and Ponies. The variation in the number of animals in different species of livestock in comparison to the previous census is shown in the table 24.2:

Table 24.2: Total Livestock in 2003 and 2012

#Excluding Stray Cattle and Stray Dogs

Note: Figure 'zero' means either 'nil' or negligible.

Trend of total livestock population 2003-2012

The change in the total livestock population over past 3 livestock censuses is depicted below:

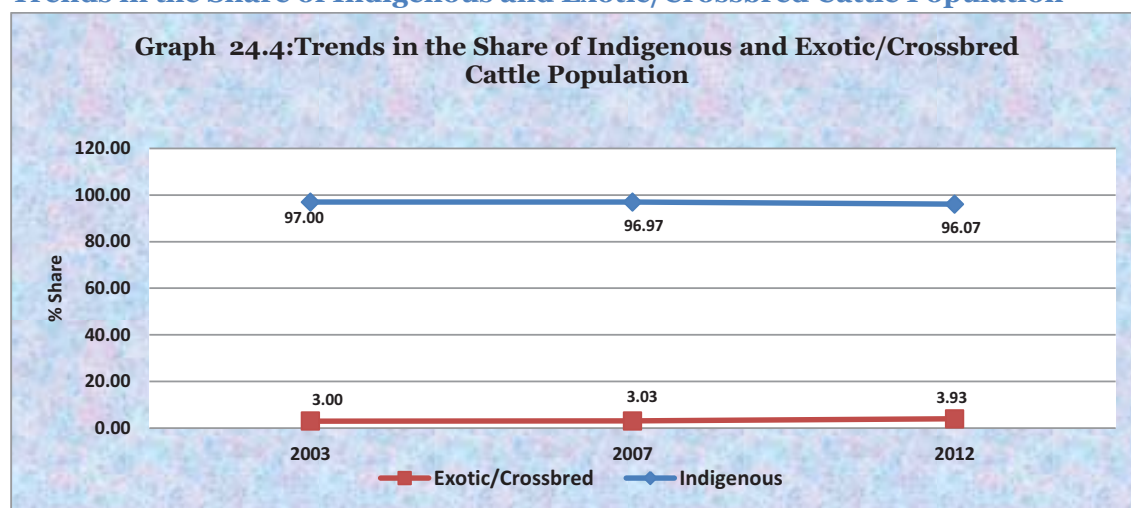

Cattle

The total cattle population is 0.89 million numbers in the state. There is a 0.99% increase in number of cattle during the inter census period (2007-2012).

The above graph shows that the total exotic/crossbred cattle population has increased from 0.02 million during 2003 to 0.03 million in during census 2012. The Indigenous cattle population has also increased from 0.74 million in 2003 to 0.86 million in 2012. The exotic/crossbred and indigenous cattle population has shown percentage changes of 31.28% and 0.04% respectively during the inter-census period (2007-2012).

Trends in the Share of Indigenous and Exotic/Crossbred Cattle Population

The diagram above shows the trends in the percentage share of indigenous and exotic/crossbred cattle over total cattle population during the period 2003-2012. The percentage share of exotic/crossbred cattle and indigenous cattle is showing a marginal variation during the previous census.

Cattle-Female

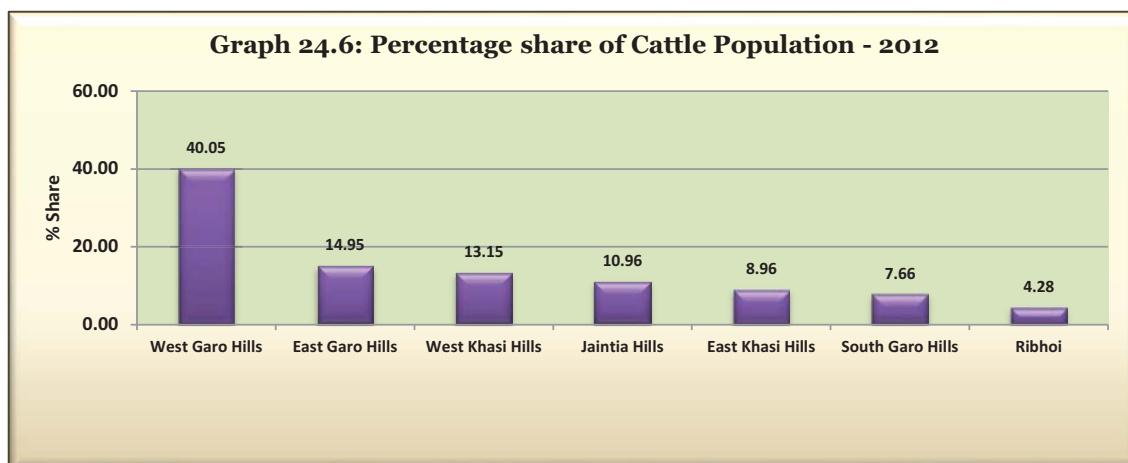

The total number of female cattle in the state is 0.54 million as per census 2012. The number of female cattle has increased from 0.41 million in 2003 to 0.54 million in 2012 as depicted in the diagram below. However, over the previous census the female cattle population has increased by 5.81%.

District-wise Cattle Population

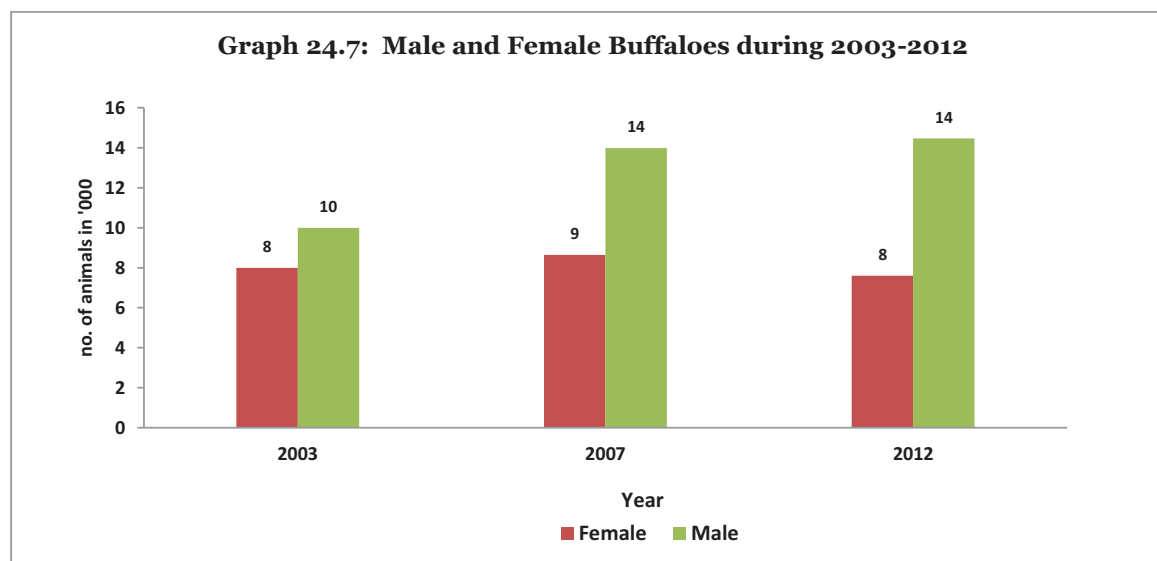

The graph below shows that the District of West Garo Hills has the highest contribution in cattle population with 40.05%. The second and third highest

contributors are East Garo Hills and West Khasi Hills with share of cattle population of 14.95% and 13.15% respectively.

Buffalo

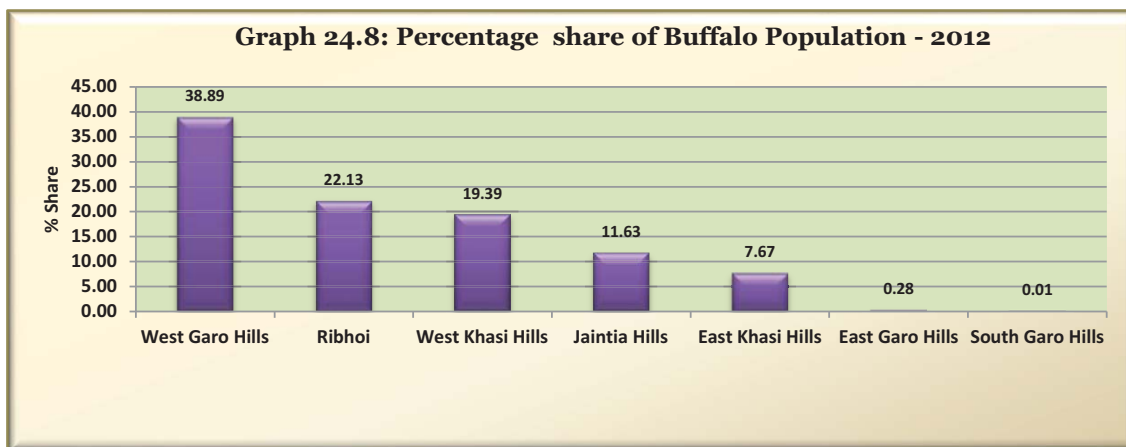

The total buffalo population in the State is 0.02 million numbers. There is a decrease in number of buffaloes with 2.51% during the inter censuses period (2007-2012).

As per the above diagram it is observed that though the female buffalo population has increased from 0.008 million in 2003 to 0.009 million in 2007, it further decreased to 0.008 million by 12.07% during the inter censuses period (2007-2012).

District-wise Buffalo Population

The graph below shows that the District of West Garo Hills has the highest contribution in buffalo population of 38.89%. The second and third highest contributors are Ribhoi and West Khasi Hills with share of buffalo population of 22.13% and 19.39% respectively.

Sheep

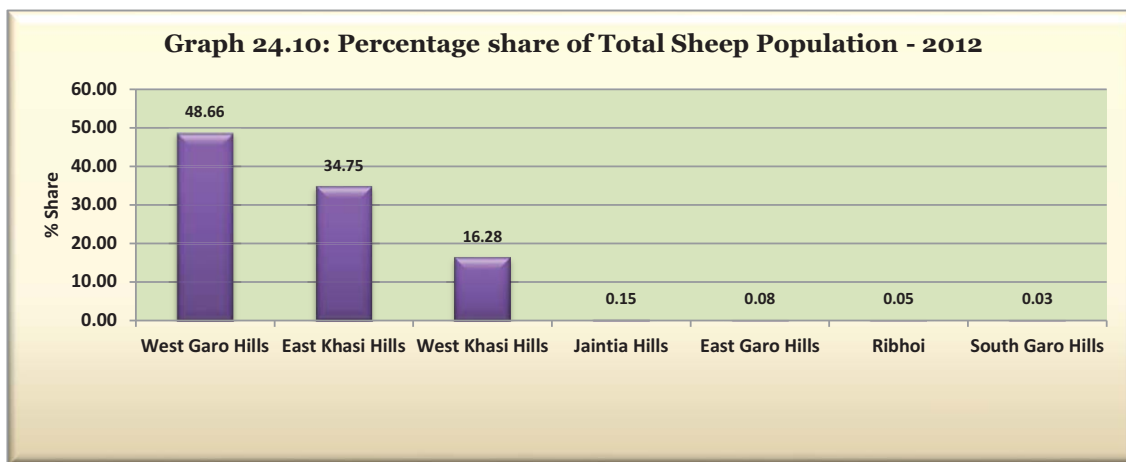

The total sheep population in the state is 0.02 million numbers. There is 4.49% decline in number of sheep during the inter censuses period (2007-2012).

The number of exotic/crossbred sheep has decreased from 0.001 million in 2003 to around 0.0006 million in 2012. The number of indigenous sheep has decreased from 0.018 million in 2003 to 0.019 million in 2012. The percentage changes in number of exotic/crossbred and indigenous sheep are 149.69 and -6.25% respectively during the inter censuses period (2007-2012).

District-wise Sheep Population

The graph below shows that the District of West Garo Hills has the highest contribution in sheep population with 48.66%. The second and third highest contributors are East Khasi Hills and West Khasi Hills with share of sheep population of 34.75% and 16.28% respectively.

Goat

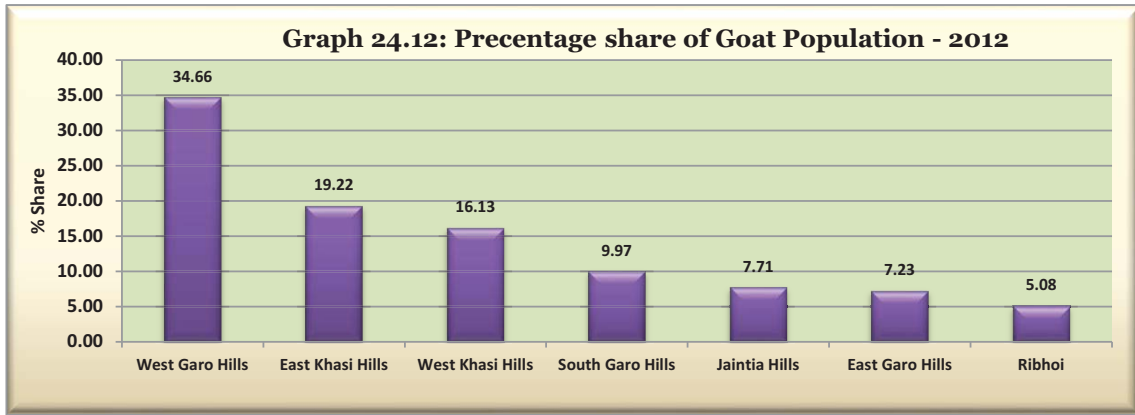

The total number of goat in the state as per census 2012 is 0.47 million numbers. There is a 29.44% growth in number of goat population during the inter censuses period (2007-2012).

The diagram above shows that the total number of female goat population has increased from 0.15 million in 2003 to 0.28 million in 2012. However, the female goat population has increased by 23.2% over the previous census. The male goat population has increased from 0.17 million in 2003 to 0.19 million in 2012. The population of male goat has increased by 40.04% during the inter-census period (2007-2012).

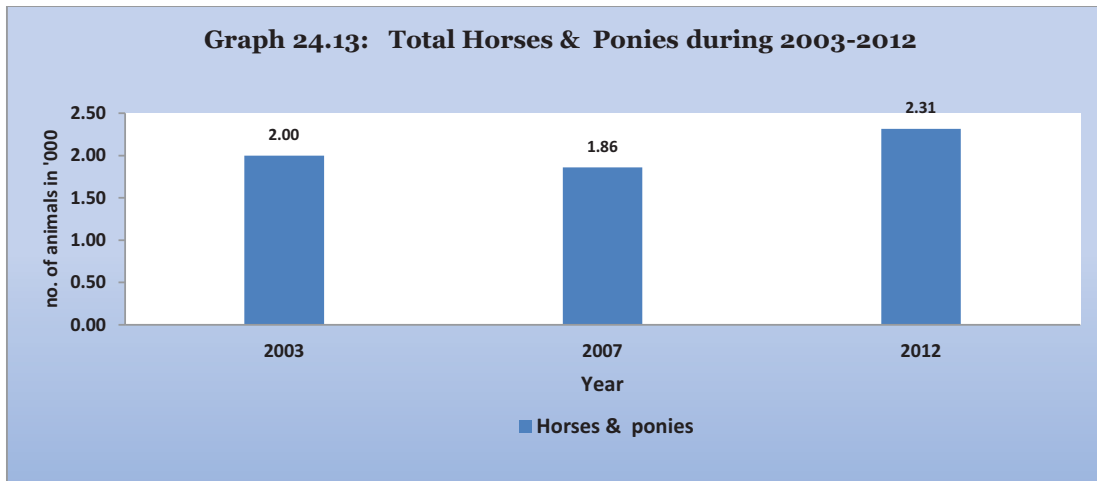

District-wise Goat Population

The graph below shows that the District of West Garo Hills has the major contribution in goat population of 34.66%. The second and third highest contributors are East Khasi Hills and West Khasi Hills districts with share of goat population of 19.22% and 16.13% respectively.

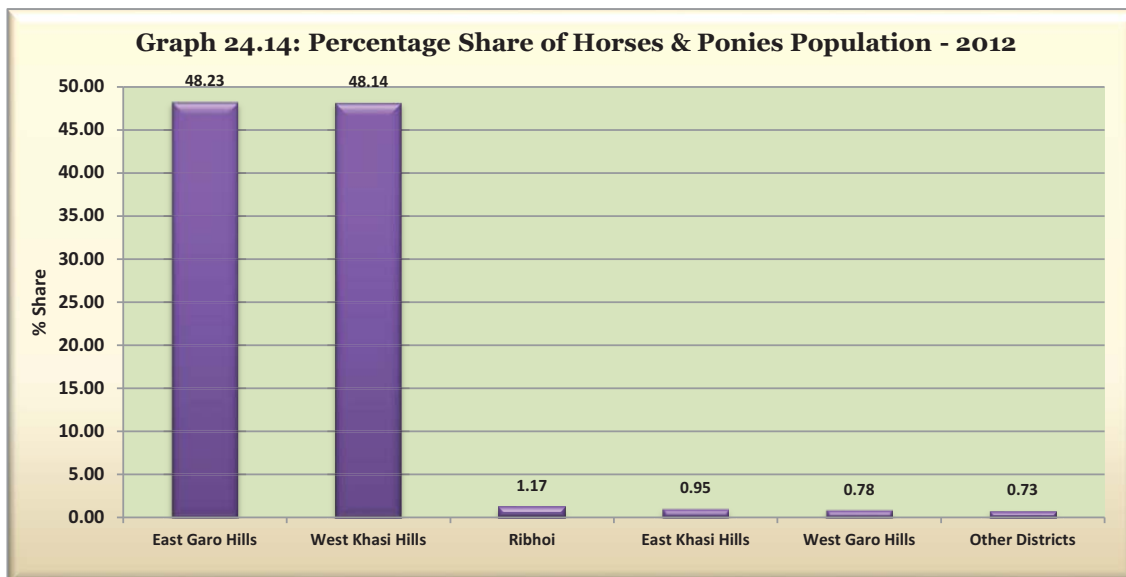

Horses & ponies

The total number of horses & ponies in the state as per 2012 census is 0.002 million numbers. There is 24.54% increase in number of horses & ponies during the inter censuses period (2007-2012). The changes in the horses & ponies population over previous three census are depicted in the graph below.

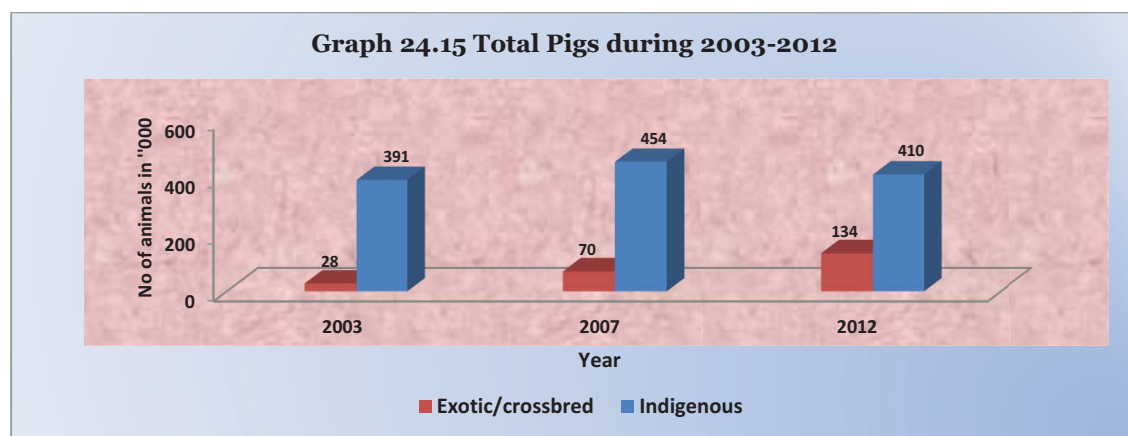

District-wise Horses & Ponies Population

The graph below shows that the District East Garo Hills has the highest contribution in horses & ponies population of 48.23% with total horses & ponies population of 0.001 million. The second and third highest contributors are West Khasi Hills and Ribhoi with share of horses & ponies of 48.14% and 1.17% respectively.

Pigs

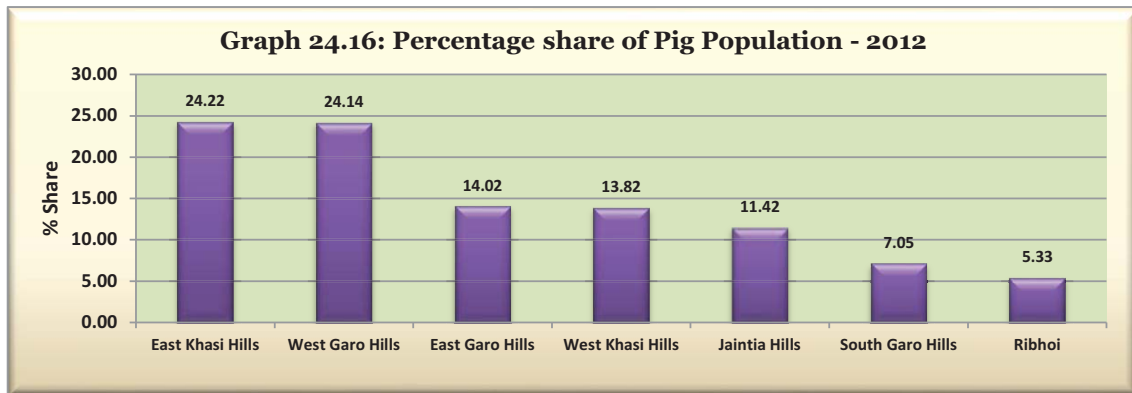

The total number of pigs in the state as per census 2012 is 0.54 million numbers. There is a 3.63% increase in number of pigs during the inter censuses period (2007-2012).

The number of exotic/crossbred pig has increased from 0.02 million in 2003 to 0.13 million in 2012. The number of indigenous pig has also increased from 0.39 million in 2003 to 0.41 million in 2012. The percentage changes in number of exotic/crossbred and indigenous population are 90.46% and -9.78% respectively during the inter censuses period (2007-2012).

District-wise Pig Population

The graph below shows that the District of East Khasi Hills has the highest contribution in pig population of 24.22%. The second and third highest contributors are West Garo Hills and East Garo Hills districts with share of pig population of 24.14% and 14.02% respectively.

Poultry

The poultry population is mainly contributed by fowls in Meghalaya with total poultry population of 3.4 million numbers. The changes in the poultry population over previous three censuses are depicted in the graph below:

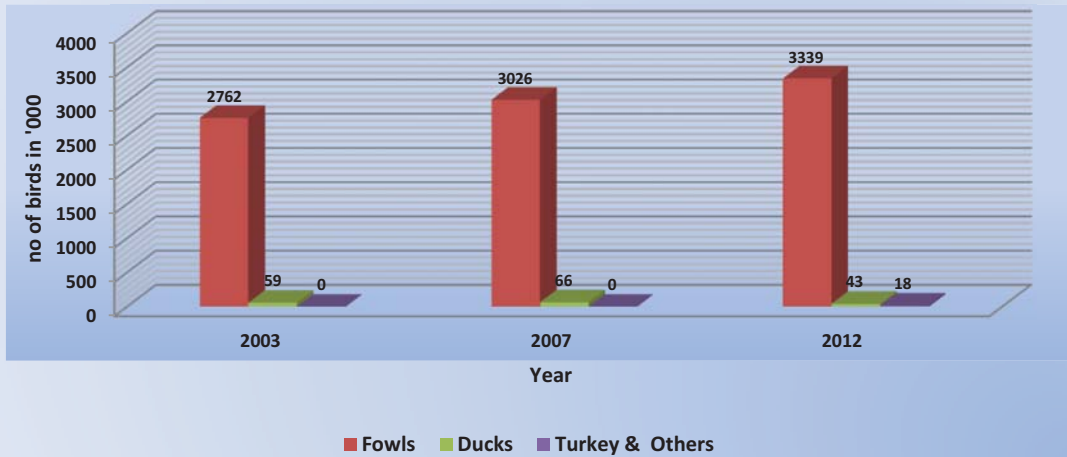

The total poultry population is showing increasing trend during 2003-2012. The birds have increased from 2.82 million numbers in 2003 to 3.4 million numbers in 2012. There is an increase of 9.93% in the poultry population during the inter census period (2007-2012).

Fowl, Duck and Turkey and others

The diagram below shows the number of poultry birds i.e. fowl, duck and turkey and others over the period 2003-2012.

Graph 24.18: Total Poultry (Fowls, Ducks, Turkey & Others)

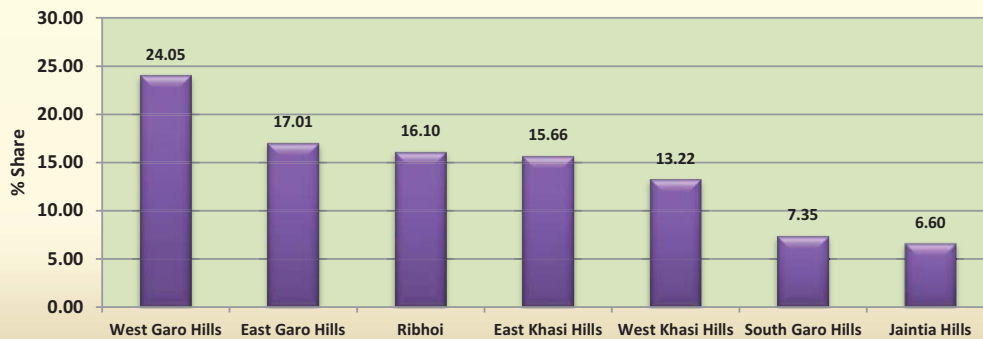

The diagram above shows that the population of fowls has been increasing continuously since 2003. The fowls have increased from 2.76 million numbers in 2003 to 3.33 million numbers in 2012. The fowl population has increased by 10.31% over the previous censuses periods. The ducks population has decreased from 0.05 million numbers in 2003 to 0.04 million number in 2012. The ducks population has decreased by 35.13% over the previous census. The population of turkey and other birds have drastically increased during inter-censuses period (2007-2012).

District-wise poultry Population

The graph below shows that the District-wise percentage of poultry population.

Graph 24.19: Percentage share of Poultry Population - 2012

The graph shows that the District West Garo Hills having the highest contribution of 24.05% of total poultry population in the state with total poultry population 0.81 million. The second and third largest contributors are East Garo Hills and Ribhoi with 17.01% and 16.10% respectively.

Uses- Cattle, Buffalo and Goat

Animals in milk

Animals in milk mean the animals which contribute towards production of milk. The total number of animals in milk in the State is 0.26 million numbers. The diagram below shows the percentage share of animals in milk for three major species such as cattle, buffalo and goat.

The Indigenous cattle contribute with 63.75% animals in milk in the state. Goat, exotic/crossbred cattle, buffalo are the next contributors of in milk in the state with a share of 30.05%, 5.42% and 0.77% respectively.

Animals used for Breeding

The diagram below shows male cattle and buffalo used for breeding.

The detailed statistical tables, species and district wise, with rural and urban combinations are presented in the Annexure-XXIV for reference.
